

Prevent Unwanted Access, Quarantine Zero-Hour Malware Attacks & Phishing Attacks

NetSHIELD delivers a rich feature set of agentless network access control (NAC) and critical intranet security that firewalls and AV solutions do not address & where 95% of today's breaches occur. NetSHIELD ensures only trusted assets access corporate networks. Additionally, zero-hour malware and phishing attack real-time quarantine, mac-spoof detection, TLD blocking, comprehensive auditing, vulnerability assessments, and compliance reporting & enforcement make this a comprehensive and compelling offering. The NetSHIELD solution is available as a hardware appliance that scale from 25 to 10,000 protected assets per appliance. In addition, an embedded command center allows administrators to manage up to 1000 remote sites.

InfoSec

Block engine

- * Prevent untrusted, unknown and/or unwanted assets from accessing network
- * Dynamic or manual blocking
- * Block asset, peer and port

Pre-Cognition Engine

- * Zero-hour malware quarantine – NO false positives
- * Phishing attack quarantine – NO false positives

Mac spoof detection/blocking

TLD blocking

Audit and Compliance

Agentless asset detection & security

Asset auditing

Vulnerability assessment

Patch management

Compliance and regulatory reporting and enforcement (HIPAA, SOX, GBLA, PCI, FISMA, ISO-27001, etc)

KEY FEATURES

Control Trusted Access

Agentless Network & Device Protection

Proactive Protection from Phishing & Malware

Detect and Block Rogue Access

Quarantine Zero Day threats & Remote Access Trojans

TLD Blocking

Dynamic VLAN Assignment & Quarantining

Manage Mobility & Secure BYOD (option)

Vulnerabilities Assessments & Patch

Automated Compliance Reporting

SIEM/USM Integration

Manage Internal Risk

Non-inline. Plug Anywhere, Discover Everywhere

High Availability

Proactive Breach Prevention

Today's cyber security marketplace is full of solutions all promising to address corporate network security. Unfortunately too often your front door has become the back door.

Take charge of your corporate network(s) with a highly scalable, affordable and simple to manage network and mobility access control solution. Gain control and confident oversight of your networks, trusted LAN(s), manage compliance reporting, audit assets, identify vulnerabilities and defend against malicious insiders, rogue access, zero day malware, phishing attacks and data exfiltration.
