

Sophos UTM Wireless Protection

Ensures secure and reliable Wi-Fi access all over the office

- ▶ **Plug & play deployment:** When you plug in the access point anywhere on your network the Sophos UTM appliance automatically and instantly shows the new installation.
- ▶ **Central management:** Manage all access points and wireless clients in your central Sophos UTM appliance through the built-in wireless controller.
- ▶ **Integrated security:** Instantly protect all wireless clients through complete security provided by the central Sophos UTM appliance.
- ▶ **Strong encryption:** Support of state-of-the-art Wi-Fi security protocols ensures the wireless connection is completely secure.
- ▶ **Placement choice:** All access points can be placed anywhere in your organization. The wireless signal will cover the whole office.
- ▶ **Wi-Fi hotspot:** Easily set up various types of wired and wireless hotspots to grant temporary Internet access.

Sophos UTM Wireless Protection simplifies the operation of secure and reliable wireless networks. The Sophos UTM appliance acts as a wireless controller, automatically sets up and configures access points which you can easily monitor and manage, saving you time and resources.

Deployment scenario of Sophos UTM Wireless Protection

Your Benefits

- ▶ Easy setup of multiple and groups of Sophos Access Points
- ▶ No local configuration of access points required
- ▶ Complete UTM protection for all wireless clients
- ▶ Maximum protection of wireless data traffic
- ▶ Uninterrupted signal covering the whole office
- ▶ Quick setup of voucher-based Internet guest access

"What I really like about Sophos' integrated wireless protection approach is that it frees our administrators from separately managing an expensive enterprise wireless solution."

Jason Richards, CEO, Vineyard Networks

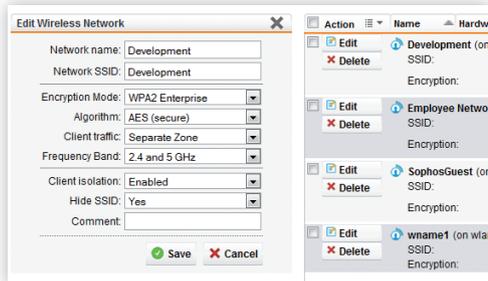

Technical Specifications

Wireless controller	UTM 110	UTM 120	UTM 220	UTM 320	UTM 425	UTM 525	UTM 625
Recommended sizing							
Number of access points	2	4	8	16	32	64	128
Number of wireless users	10	25	50	100	250	500	1,000

Add-ons

Every company's network and operating mode is different. We provide you with a number of add-ons you can select and combine to suit your needs.

Essential Network Firewall

Offers basic security functions to help protect your business network.

UTM Network Protection

Protects against sophisticated types of malware, worms and hacker exploits that can evade your basic firewall.

UTM Email Protection

Secures your corporate email from spam and viruses while protecting sensitive information from cybercriminals.

UTM Web Protection

Protects your employees from web threats while controlling how they spend time online.

UTM Webserver Protection

Protects your web servers and applications like Outlook Web Access (OWA) from modern hacker attacks.

Coming soon: UTM Endpoint Protection

Protects endpoints at any location against malware and data loss with a centrally deployed security agent.

RED (Remote Ethernet Device)

It's the easiest and most affordable way to secure your branch offices.
