

Sophos Anti-Virus— Business

Simplified, essential protection for less

You're safer in our world because we deliver essential threat protection for all your laptops and desktops. Our integrated solution secures your Windows, Mac and virtualized systems against malware, adware and suspicious files and behavior. And, we provide application control to cut down on infection and data loss, while helping user productivity. We make it easy to install, manage and use—saving you time and money. And, it's all one license that includes unlimited 24/7 support, free security updates and software upgrades—without stretching your antivirus budget.

- ▶ Proven protection that automatically identifies new malware threats and cleans them up
- ▶ One agent scans for viruses and controls applications
- ▶ We deliver more protection with less impact on your users—our scanning is now 15% faster than our last major upgrade. [See how analysts rate us](#)
- ▶ It's all easily managed by one console. [Enex TestLab says we save you time](#)
- ▶ We are always here for you. From our SophosLabs analysts who monitor and fine tune detection rules, to our [24/7 certified expert support](#)

Block threats, not productivity

We make it simple for you to keep your users safe without getting in the way of their work. Our fast scanning engine takes care of everything, and it's now up to 15% faster than our last major upgrade.

Detects and removes viruses, spyware, rootkits, Trojans, adware and potentially unwanted applications (PUAs). [Gartner names us a "Leader" in Endpoint Protection Platforms Magic Quadrant.](#)

Minimizes the impact on computer performance with our single scanning engine that independent tests rate as the fastest of any major security vendor—now even faster in Endpoint 10.

Protects your Windows, Mac and virtualized systems from one management console.

Stops new threats with live checks against our reputation database.

Controls application with lists of applications we provide to easily block installation and use of unwanted applications.

Centrally deploys small and frequent updates—now up to 41% faster than our last major upgrade—without affecting network bandwidth and system performance.

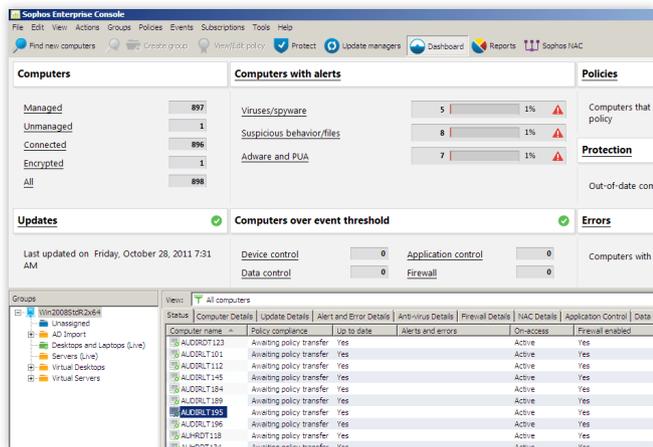

Quickly and easily encrypt files, email attachments and files saved to removable storage (PrivateCrypto).

Compare

Our [Complete Security Suite](#) combines endpoint, data, email, web, server and mobile protection, all in one license. Get the best threat and data protection across all points and platforms.

Or compare our [Endpoint Protection](#) products to add device control, web protection, DLP, patch assessment, NAC and protection for Microsoft Exchange.

Endpoint protection for Windows, Mac and virtualized platforms.

Free up your time

Setting up the security you need is easy, and maintaining your protection takes practically no time at all. And, we make switching security vendors easy too.

Removes old antivirus software With a built-in removal tool that will automatically uninstall your current antivirus.

Complete management package Installs everything you need for your management server.

Deployment options It's easy to find computers and deploy antivirus. We even give you a choice of methods, including our Active Directory.

A single dashboard See your endpoints' protection status, events and actions across all supported platforms.

Role-based administration Share and delegate responsibility for actions, such as cleaning up infections.

Scheduled reporting Allows you to configure and schedule reports so everyone gets the information they need, when they need it.

Platforms supported

- Antivirus
- Windows 7/Vista/XP Home SP1a and above/Pro SP1a and above/2000 and 2000 Pro SP3 and above/Windows XPe/Windows Netbooks/Windows Embedded Standard/WePOS/Mobile/Server 2003/2003 R2/Server 2008 incl. Core/2008 R2 incl. Core
 - VMware 4.x/vSphere 4/ESX 3.5/Workstation 6.5/7.0 Server 2.0
 - Microsoft Hyper-V 6.0 and Server 2008
 - Citrix XenServer 5.0/5.5/5.6

Sophos Client Firewall

- Windows 7/Vista/XP Home SP1+ and Pro SP1a+/2000 Pro SP3+

Enterprise Console

Remote Console

- Windows 7 (incl. XP mode)/Server 2008/2008 R2/Server 2003/2003 R2/Vista/XP Pro

Management server

- Windows 7 (incl. XP mode)/Server 2008/2008 R2/Server 2003/2003 R2
- VMware 4.x/vSphere 4/ESX 3.5/Workstation 6.5/7.0 Server 2.0
- Microsoft Hyper-V 6.0 and Server 2008
- Citrix XenServer 5.0/5.5/5.6

Platforms managed

- Windows 7/Vista/XP/2000/Server 2008* incl. Core/Server 2003
- Mac OS X Versions 10.4/10.5/10.6/10.7
