

UTM TotalProtect Bundles

Sophos UTM TotalProtect combines purpose built, high-performance hardware with all the network security you need from next-gen firewall to secure wi-fi. All in a single appliance it simplifies your IT security without the complexity of multiple-point solutions. The intuitive interface helps you quickly control security risks. And clear, detailed reports will give you the insight you need.

Highlights

- ▶ Firewall, VPN, IPS, email, web filtering and app control
- ▶ Intuitive browser-based interface
- ▶ Built-in reporting on all models
- ▶ UserPortal lets users manage spam and install VPN Clients
- ▶ Integrated wireless controller
- ▶ Includes 24/7 support

Consolidated network security platform—no compromise

Quickly protect your network using proven protection technologies including IPS, VPN, email and web filtering combined with the industry's simplest admin interface. You can even protect confidential emails with email encryption and quickly harden your web servers and apps against attack with no training required for admins or web developers.

All the Next-Gen Firewall features you need

We'll give you complete control to block, allow, shape and prioritize applications. Our Deep Layer-7 inspection (Next-Generation Firewall) ensures true application identification for over 600 applications. We'll update these automatically and you'll get feedback on unclassified applications too.

Intuitive management and detailed reporting

You'll know what's happening with your users and you'll have complete control over all the features you need, with none of the complexity. Easily build policies while getting detailed reports with the info you need to fix problems fast. And our Free Sophos UTM Manager lets you centrally administer several appliances through a single login.

Connect remote offices with easy VPN and Wi-Fi

Sophos RED (Remote Ethernet Device) provides secure remote access to your off-site locations. It's the first security gateway that requires no technical skills at the remote site. Once installed, it forwards traffic to the UTM for complete security. Sophos UTM also works as a wireless controller; access points are automatically set up and receive complete UTM protection.

High performance appliances

Our hardware appliances are purpose built, high-performance devices. They integrate our security applications with a hardened operating system (OS) on optimized Intel compatible server systems. By optimizing scanning and using multicore capabilities, we boost performance and give you the throughput speeds you need.

"We chose Sophos UTM for its all-in-one approach, trouble-free installation and management at an affordable price".

Martin Bělohávek, Systems Administrator, MAN ČR, MAN Group
