CORPORATE OVERVIEW

Alert Logic Security-As-A-Service

SECURITY AND COMPLIANCE SOLUTIONS, DELIVERED AS A SERVICE

Alert Logic simplifies IT security and compliance management by delivering Security-as-a-Service consisting of advanced security tools integrated with 24x7 expert security services, an "as-a-Service" delivery model, and deployment wherever IT goes.

SECURITY-AS-A-SERVICE COMPONENTS

Advanced Security Tools
Intrusion detection, log management, application protection and vulnerability assessment tools that are on-demand, highly scalable and pay-as-you-go.

Expert Security Services
24x7 Security Operations Center provides monitoring, analysis and expert guidance services by certified GIAC analysts who act as an extension of your IT team.

"As-a-Service" Delivery
Day-to-day management of security infrastructure and operations, including support and maintenance, to minimize head count and budget impact. On-demand availability with integrated provisioning and decommissioning processes.
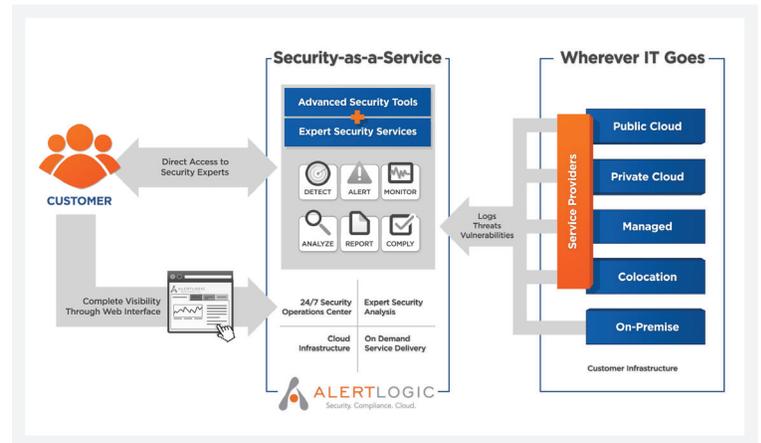

Wherever IT Goes
Multi-tenant architecture, scalable platform and multiple deployment options enable seamless integration of security and compliance solutions to address customer security needs in on-premises, public cloud, private cloud and hybrid environments.

SAFEGUARDING DATA, ENSURING COMPLIANCE

Alert Logic uniquely sits at the nexus of threat, vulnerability and log data within your network and leverages our global sensor footprint across more than 2,500 customers. This gives us unparalleled visibility to accurately identify and prioritize security incidents based on a broad threat picture that is not matched by off-the-shelf software. Additionally, our in-house security research team constantly investigates the newest vulnerabilities, develops the latest threat correlation rules and deploys them globally to automate network sensor tuning.

With audit-ready dashboards and reports, daily log review services and regular scans by a PCI Approved Scanning Vendor (ASV), Alert Logic automates the most costly and resource-intensive compliance mandates.

KEY BENEFITS

COMPLIANCE & SECURITY SAFEGUARDS	Alert Logic can not only quickly deploy solutions that help get your network secure and your data in compliance, but also has the tools and services to keep your infrastructure compliant with PCI, HIPAA, SOX and other regulatory measures.
INTELLIGENCE IN ACTION	Alert Logic's security research and analysis team operationalizes security by aggregating data, automating analysis and applying expert intelligence to identify impending threats.
MANAGED SERVICE DELIVERY	All of our solutions are delivered as a managed service with the objectives of keeping your data safe, saving you time and giving you peace of mind so you can concentrate on your business.
CLOUD PLATFORM	Alert Logic is built for—and in—the cloud. Its multi-tenant architecture and scalable platform enable on-demand security and compliance solutions for companies transitioning to the cloud, regardless of where or how their IT is managed.
COST SAVINGS	Because our Security-as-a-Service model is built on a platform that fully integrates our software solutions, security operations and research team, you don't need to hire a special team of security experts, incur operational expenses or worry about maintenance fees.
APP PROTECTION	Alert Logic Web Security Manager deploys on-premises, in hosted environments or in the cloud, without complex integration. Now you can protect your web applications and sites with proven technology and expert staff without the difficulties usually experienced with Web application firewalls.

PRODUCTS & SERVICES

Alert Logic Threat Manager	– Threat Manager is a vulnerability assessment and intrusion detection solution that is delivered using a Software-as-a-Service (SaaS) model. With Alert Logic's Threat Manager and ActiveWatch solutions, you can now cost-effectively defend and `protect your network against internal and external threats across centralized and distributed environments. – Alert Logic's patented expert system, purpose-built grid computing infrastructure, and the automatic aggregation and correlation of anomalous behavior patterns quickly identify threats and attacks.
Alert Logic Log Manager	– Log Manager automates log collection, aggregation and normalization, simplifying log searches, forensic analysis and report creation through real-time or scheduled analysis. Once logs are transferred to Alert Logic's secure cloud, Log Manager protects and stores the data to preserve against unauthorized loss, access or modification.
Alert Logic Web Security Manager	– Web Security Manager provides active protection against web application attacks, one of the more prevalent threats to business-critical applications. Proactively blocking unauthorized activity, Web Security Manager effectively protects against the most dangerous attacks, such as SQL Injection and Cross-Site Scripting.
ActiveWatch and LogReview Services	– ActiveWatch is integrated with Threat Manager to provide 24x7 network monitoring, expert analysis and guidance on security events and incidents. This service increases the accuracy of threat detection, reduces false positives and allows you to stay focused on your business. – ActiveWatch for Web Security Manager provides 24x7 monitoring and ongoing tuning of your web application firewall, along with escalation for inappropriately blocked requests. – LogReview provides daily event log monitoring and review, and is designed to help you meet PCI DSS requirement 10.6. A team of certified security analysts acts as an extension of your team to expertly review your log data daily and alert you whenever suspicious activity or possible security breaches are detected. – These services are managed from Alert Logic's state-of-the-art, 24x7 Security Operations Center (SOC), which is staffed by security professionals with Global Information Assurance Certification (GIAC) from the SANS Institute.

ABOUT ALERT LOGIC

Alert Logic, the leading provider of Security-as-a-Service solutions for the cloud, provides advanced security tools coupled with 24×7 Security Operations Center expertise, allowing customers to defend against security threats and address compliance mandates. By leveraging an "as-a-Service" delivery model, Alert Logic solutions include day-to-day management of security infrastructure, security experts translating complex data into actionable insight, and flexible deployment options to address customer security needs in any computing environment. Built from the ground up to address the unique challenges of public and private cloud environments, Alert Logic partners with over half of the largest cloud and hosting service providers to provide Security-as-a-Service solutions, such as intrusion protection, vulnerability assessment and log management for over 2,500 enterprise customers. Alert Logic is based in Houston, Texas, and was founded in 2002. For more information, please visit www.alertlogic.com.
