

# Sophos Enduser Web Suite

## Complete web protection everywhere

- ▶ Combines the best of our endpoint, mobile, cloud, and gateway in a single license
- ▶ Uses the endpoint to scan for web threats wherever users go
- ▶ Provides you full visibility into user activity no matter where they are
- ▶ Enforce a different policy for offsite users and onsite users
- ▶ Keep everything connected through our LiveConnect cloud service
- ▶ Eliminate compromises you've been living with for years
- ▶ Forget about backhauling, VPNs, additional endpoint software or big iron appliances
- ▶ Get easy deployment and switching tools
- ▶ Backed by our SophosLabs global security experts and **the best support** in the industry
- ▶ Take advantage of our support any time of day, should you need it

You're safer in our world because we provide proven, comprehensive protection that fits your security budget. Our Enduser Web Suite integrates the best of our Web Appliances and Enduser Protection to give you complete web protection everywhere users go, and help you consolidate your IT security vendors and budget. We eliminate the cost and complexity associated with backhauling, VPNs or additional services or software. No separate deployment needed—it's an all-in-one product.

## Ideal for . . .

Sophos Enduser Web Suite is ideal for organizations of any size needing complete web protection. Protect your users everywhere they go. It's simple to manage and affordable.

**The simplified management** and rich reporting of our Web Protection gives you control and visibility of users' activity on the web.

## All in one license

One license includes complete web and threat protection across all platforms, plus 24/7 support and free updates. Your Sophos Enduser Web Suite license includes:

## Web: Complete web security and control

Combining the best of the gateway, endpoint and cloud to provide better web protection everywhere.

**Protect against new zero-day threats** with our advanced web malware scanning.

**Block access to millions of infected sites** with reputation filtering.

**Simplify custom URL filtering** policies for different users and groups with a simple wizard.

**Enforce compliance** by blocking anonymizing proxies.

**Eliminate blind spots** with HTTPS filtering that scans SSL encrypted traffic.

**Protect users everywhere**, on the network or off, with our Web Filtering in Endpoint.

**Save time** with simple three-clicks-to-anywhere management.

**Manage and report across** multiple locations and up to 15,000 users—from a single appliance.

**Provide guaranteed protection** with our remote monitoring software, traffic and updates.

## Endpoint: Block threats, not productivity

We give you everything you need to stop malware and protect your data in one console and agent. It's fast, effective and complete security for your users, wherever they are.

**Detects and removes** viruses, spyware, rootkits, Trojans, adware and potentially unwanted applications (PUAs). Independent testers say it's the most effective threat detection of any major vendor.

**Minimizes the impact** on computer performance with our single scanning engine that independent tests rate as the fastest of any major security vendor.

**Protects your Windows, Mac, Linux, UNIX** and virtualized systems from one management console.

**Stops new threats** with live checks against our reputation database.

**Our new Web Filtering in Endpoint** gives you full visibility and control of web activity—[learn more](#).

**Includes DLP** that lets you control the movement of sensitive information.

**Blocks unwanted applications** with an application control list we maintain so you don't have to.

**Provides device control** so you can easily set rules for using removable storage devices.

**Scan computers for missing patches.** Our Patch Assessment scans, identifies and prioritizes for critical threat-related security patches—[learn more](#).

**Includes network access control** that checks computers for security compliance, updates policies.

**Protect your data** with file encryption technology (PrivateCrypto).

**Centrally deploys small and frequent updates**—now up to 41% faster than our last major upgrade—without affecting network bandwidth and system performance.

## Mobile: Securely enable BYOD

Our Mobile Device Management (MDM) makes secure access to corporate email and data from smartphones and tablets easy.

**Full policy control** for iPhones, iPads, Android devices, BlackBerry, and Windows Mobile devices.

**Enable safe web browsing** on iOS 6 devices to keep users protected from inappropriate and malicious sites on iPhones and iPads.

**Prevent data loss** with policies for auto locking, strong passcodes, and the ability to track, lock or wipe a lost or stolen device.

**Manage apps** with your own enterprise app store and the ability to block unwanted apps.

## Exchange: Antivirus and anti-spam for your Microsoft Exchange servers

Blocks spam, viruses, spyware and phishing. Scanning all inbound, outbound and internal email and Exchange message stores, it proactively protects against email-borne threats, and prevents confidential data being lost.

## Better together

The security included in our Enduser Web Suite works together to deliver better protection, greater visibility and ease of use—including:

- ▶ We combine gateway, mobile, endpoint and the cloud to give you complete web protection everywhere users go. Set your web policy at the gateway and scan at the endpoint.
- ▶ Our new WebLENS network layer scanning technology blocks threats using content reassembly with JavaScript emulation and behavioral analysis to stop malicious code before it's passed to the browser.
- ▶ Enforce safe, productive web policies across mobile iOS 6 devices as well using new web proxy settings to keep users protected from inappropriate and malicious sites on iPhones and iPads.
- ▶ Anti-malware, HIPS, device and application control, web filtering and DLP all in one agent and managed by one console.
- ▶ One engine across all platforms and points including desktops, laptop and Exchange servers, as well as the email and web gateways.
- ▶ Our SophosLabs analysts constantly monitor and fine-tune detection for you—keeping an eye on applications and websites to avoid emerging threats, spam and more.
- ▶ One vendor to call for 24-hour, certified expert support and one-on-one assistance.

## Software components

### Sophos Web Filtering in Endpoint

Web policy enforcement for inappropriate sites.

### Sophos Web Protection

Your choice of Sophos Web Appliances (additional charge) or Virtual Web Appliances (no charge). Our Web Appliances provide best-of-breed web threat protection and compliance enforcement in a simple-to-manage solution—[learn more](#).

### Sophos Enterprise Console

A single, automated console for Windows, Mac, UNIX, Linux and virtualized platforms centrally deploys and manages antivirus and client firewall protection; intrusion prevention; endpoint web protection; patch assessment; data, device and application control; and endpoint assessment and control.

### Sophos Endpoint Security (antivirus, HIPS, device control, application control and DLP)

A single endpoint agent for Windows that detects viruses, spyware and adware, rootkits and suspicious files and behavior. It monitors the transfer of sensitive data off the network and blocks malicious and inappropriate websites. The agent also controls use of removable storage devices and unauthorized applications across multiple platforms. Scans and identifies computers missing critical patches for vulnerabilities commonly targeted by threats. Centrally managed client firewall designed for the enterprise blocks worms, stops hackers, and prevents intrusions.

### Sophos PureMessage for Microsoft Exchange

Antivirus and anti-spam protection for Microsoft Exchange servers.

### Sophos Antivirus for Mac, Linux, UNIX, NetWare and OpenVMS

Antivirus protection for Mac, Linux and UNIX, NetWare and OpenVMS computers.

### Sophos Mobile Control

Complete mobile device management for iOS, Android, BlackBerry, and Windows Mobile that provides full control over security policy, lost or stolen device controls, enforcement and remediation options, and app management.
